

Glossarium - FLDP001

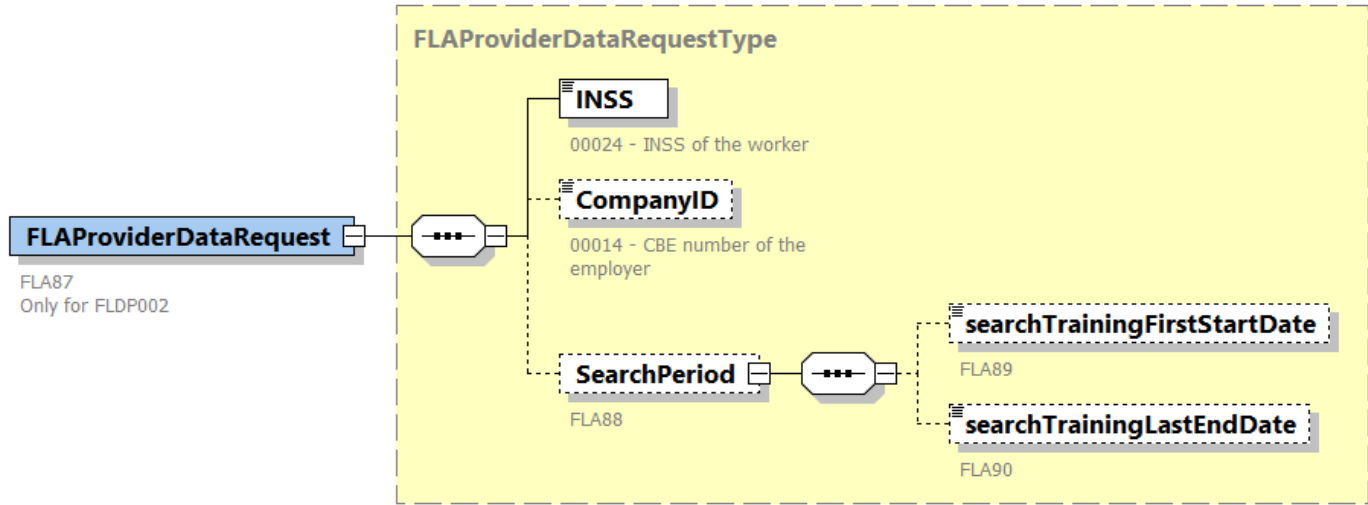

Code	name	type	presence	title ENG	description ENG
FLA41	FLAProviderDataDeclaration	functional block		FLA Declaration of a Training Provider	Main block of a FederalLearningAccount statement of a training provider. This block can contain only one child block to choose from: -TrainingMultipleParticipants -TrainingSingleParticipant -TrainingCancellation
FLA42	TrainingMultipleParticipants	functional block	See decription code FLA41	Declaration per education	Block to be used to declare a training following model 1 “per training” which can contain several participants
FLA45	TrainingId	String (36) - UUID format	Required	Unique training reference number	Unique reference number of the training in a standard UUID format: string of 36 characters (32 hexadecimal digits and 4 hyphens). This number is used to uniquely identify a training. Example: ffa072c4-6ece-43de-beef-1d1927252d58
FLA21	trainingDenomination	String (min 3 - max500)	Required	Training title	Denomination of the training.
FLA19	trainingFirstStartDate	Date	Required	First start date of the training	First start date of the training. For trainings that are declared in multiple training periods, this is the start date of the earliest period.
FLA20	trainingLastEndDate	Date	Required	Last end date of the training	Last end date of the training. For trainings that are declared in multiple training periods, this is the end date of the last period.
FLA22	trainingReferenceNbr	String - max500	Optional	Training reference	Reference of the training (declarant's internal reference number)
01047	language	Integer (int32) - Max 1 Digit	Optional	Language	Language 1 = Dutch 2 = French 3 = German 4 = English
FLA46	Participants	functional block	Required	List of participants	Data block containing all the participants of the same training.
FLA47	Participant	functional block	Required	Participant	Data block containing information related to the participant.
00024	inss	long (number) - Max 11 Digits	Required	INSS	Employee’s social security identification number. This is the national register number or bis number.
00014	companyID	long (number) - Max 10 Digits	Required	Company number	Employer's CBE number
FLAAN	LegalCompanyID	long (number) - Max 10 Digits	Optional	CBE number of the worker's legal employer	CBE number of the worker's legal employer. This is the employer who assumes legal responsibility for the worker and who is also the employer who signed the employment contract with the worker. This field is used when the factual employer (i.e., the employer for which the worker actually provided services and who has authority over him) is different from the legal employer. In this case, the factual employer is encoded in the companyID field and the legal employer is encoded in the legalCompanyID field.
FLA26	trainingResult	Integer (int32)1/9	Required	Result of the training	Zone specifying the result of the training: 1 = The training was 'successful' 2 = The training was 'failed' 3 = The training was interrupted 4 = The training was completed but had no results 5 = The training has not yet been completed
FLA30	Scope	Integer (int32) 1/9	Required	Scope	Zone indicating whether or not the training falls within the scope of the “Federal Learning Account”. This zone allows you to know whether the training is to be taken into consideration when calculating the remaining training credit. 1= Training falls within the FLA scope 2= Training does not fall within the FLA scope
FLA48	TrainingCost	integer Min: 0	Optional	Cost of the training	Amount of the cost of the training expressed in eurocents 120025 = 1200.25€
FLA49	Certificate	functional block	Optional	certificate	Block containing the characteristics of the certificate obtained at the end of the training
FLA27	trainingLeadingToCertificate	Integer (int32)1/9	Required	Training has led to obtaining a certificate	Zone indicating whether the training has resulted in obtaining a certificate (or another performance certificate such as a diploma, etc.). 1 = The training does not lead to a certificate 2 = The training leads to a certificate

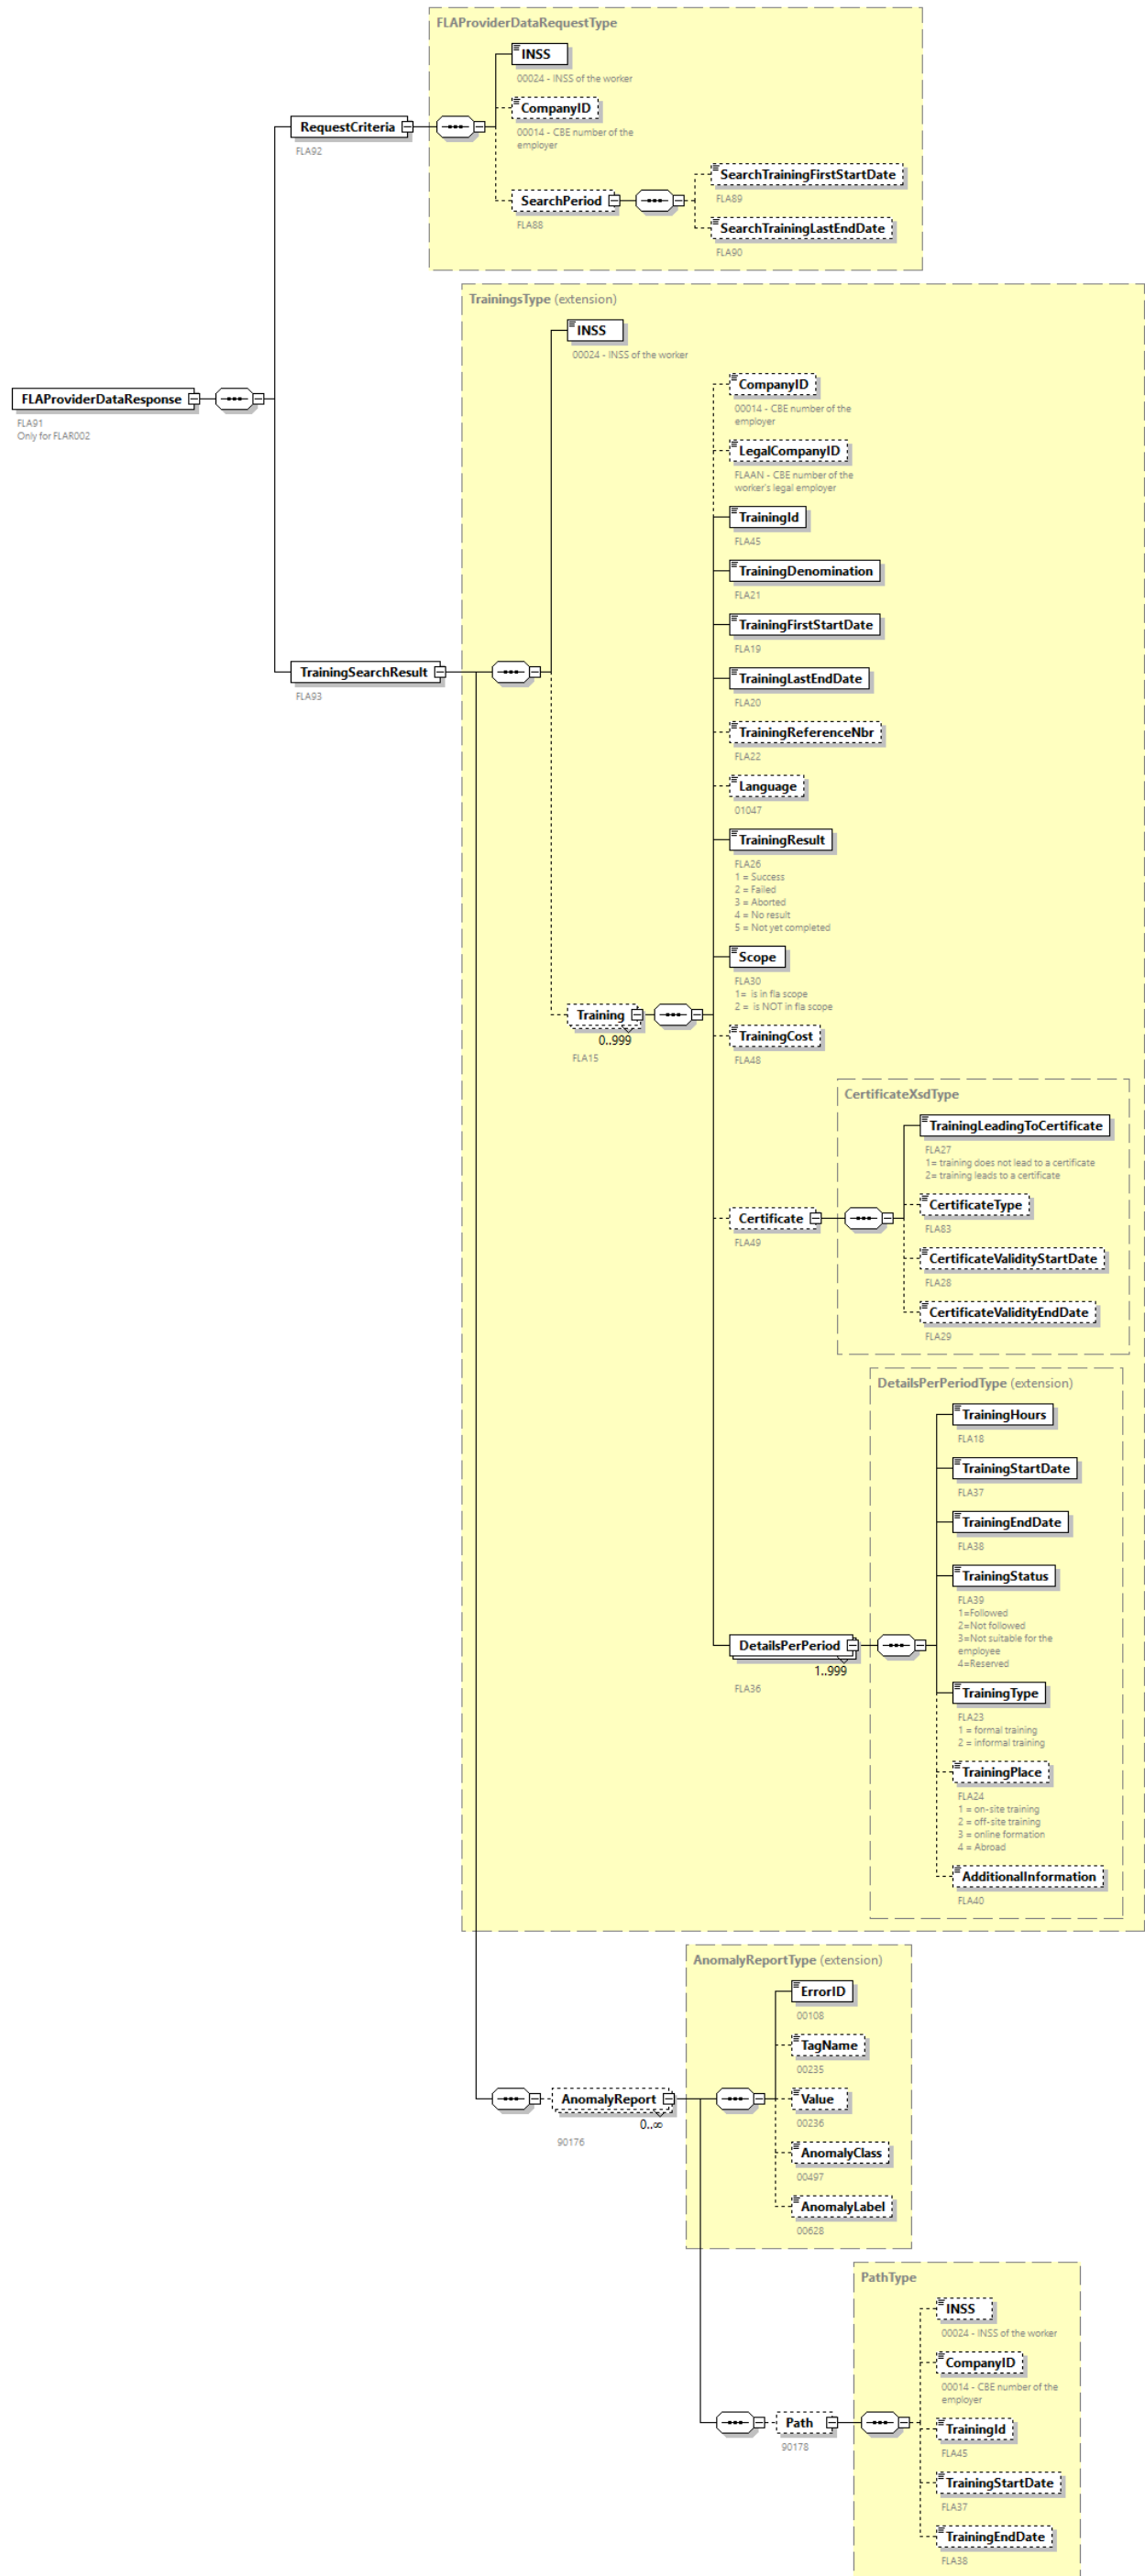

Glossarium - FLDP001

FLA83	CertificateType	Integer Min:1 - Max:99	Optional	Certificate type	Area that defines the type of certificate 1 = ..."
FLA28	certificateValidityStartDate	Date	Optional	Certificate validity start date	Start date of the validity of the certificate.
FLA29	certificateValidityEndDate	Date	Optional	Certificate validity expiry date	End date of the validity of the certificate.
FLA36	DetailsPerPeriod	functional block	Required	Details of a training period	Data block containing details about the training period
FLA18	trainingHours	Integer (int32) Min:0 - Max:1560000	Required	Number of training hours	Number of training hours of the training period expressed in hundredths of an hour. Value between 0 (= 0 hours) and 1560000 (= 15600 hours = 5 years of 312 days of 10 hours).
FLA37	trainingStartDate	Date	Required	Training start date	Start date of the training period.
FLA38	trainingEndDate	Date	Required	Training end date	End date of the training period.
FLA39	trainingStatus	Integer (int32) 1/9	Required	Training status	Zone specifying the status of the training: 1 = Followed 2 = Not followed 3 = Not suitable for the employee 4 = Reserved for the employee (not yet followed)
FLA23	trainingType	Integer (int32) 1/9	Required	Training type	Field defining the type of training: 1 = formal training 2 = informal training
FLA24	trainingPlace	Integer (int32) 1/9	Optional	Training place	Place of the training: 1 = Internal ( On-site) 2 = External (Off-site) 3 = Online 4 = Abroad (outside Belgium)
FLA40	additionalInformation	String ( max500)	Optional	Additional information	Free text area in which additional information about the training period can be indicated. Depending on the needs of the declarant, this may be the reference of the training period, the title of the training module that is/will be followed during the (specific) training period. etc.
FLA43	TrainingSingleParticipant	functional block	See decription code FLA41	Declaration per participant	Block to be used to declare training following model 2 “per participant and per training” which can contain only one participant
00024	inss	long (number) - Max 11 Digits	Required	INSS	Employee’s social security identification number. This is the national register number or bis number.
00014	companyID	long (number) - Max 10 Digits	Required	Company number	Employer's CBE number
FLAAN	LegalCompanyID	long (number) - Max 10 Digits	Optional	CBE number of the worker's legal employer	CBE number of the worker's legal employer. This is the employer who assumes legal responsibility for the worker and who is also the employer who signed the employment contract with the worker. This field is used when the factual employer (i.e., the employer for which the worker actually provided services and who has authority over him) is different from the legal employer. In this case, the factual employer is encoded in the companyID field and the legal employer is encoded in the legalCompanyID field.
FLA15	Training	functional block		Training	Block containing the training details
FLA45	TrainingId	String (36) - UUID format	Required	Unique training reference number	Unique reference number of the training in a standard UUID format: string of 36 characters (32 hexadecimal digits and 4 hyphens). This number is used to uniquely identify a training. Example: ffa072c4-6ece-43de-beef-1d1927252d58
FLA21	trainingDenomination	String (min 3 - max500)	Required	Training title	Denomination of the training.
FLA19	trainingFirstStartDate	Date	Required	First start date of the training	First start date of the training. For trainings that are declared in multiple training periods, this is the start date of the earliest period.
FLA20	trainingLastEndDate	Date	Required	Last end date of the training	Last end date of the training. For trainings that are declared in multiple training periods, this is the end date of the last period.
FLA22	trainingReferenceNbr	String - max500	Optional	Training reference	Reference of the training (declarant's internal reference number)
01047	language	Integer (int32) - Max 1 Digit	Optional	Language	Language 1 = Dutch 2 = French 3 = German 4 = English

Glossarium - FLDP001

FLA26	trainingResult	Integer (int32)1/9	Required	Result of the training	Zone specifying the result of the training: 1 = The training was 'successful' 2 = The training was 'failed' 3 = The training was interrupted 4 = The training was completed but had no results 5 = The training has not yet been completed
FLA30	Scope	Integer (int32) 1/9	Required	Scope	Zone indicating whether or not the training falls within the scope of the “Federal Learning Account”. This zone allows you to know whether the training is to be taken into consideration when calculating the remaining training credit. 1= Training falls within the FLA scope 2= Training does not fall within the FLA scope
FLA48	TrainingCost	integer Min: 0	Optional	Cost of the training	Amount of the cost of the training expressed in eurocents 120025 = 1200.25€
FLA49 Certificate		functional block	Optional	certificate	Block containing the characteristics of the certificate obtained at the end of the training
FLA27	trainingLeadingToCertificate	Integer (int32)1/9	Required	Training has led to obtaining a certificate	Zone indicating whether the training has resulted in obtaining a certificate (or another performance certificate such as a diploma, etc.). 1 = The training does not lead to a certificate 2 = The training leads to a certificate
FLA83	CertificateType	Integer Min:1 - Max:99	Optional	Certificate type	Area that defines the type of certificate 1 = ..."
FLA28	certificateValidityStartDate	Date	Optional	Certificate validity start date	Start date of the validity of the certificate.
FLA29	certificateValidityEndDate	Date	Optional	Certificate validity expiry date	End date of the validity of the certificate.
FLA36 DetailsPerPeriod		functional block	Required	Details of a training period	Data block containing details about the training period
FLA18	trainingHours	Integer (int32) Min:0 - Max:1560000	Required	Number of training hours	Number of training hours of the training period expressed in hundredths of an hour. Value between 0 (= 0 hours) and 1560000 (= 15600 hours = 5 years of 312 days of 10 hours).
FLA37	trainingStartDate	Date	Required	Training start date	Start date of the training period.
FLA38	trainingEndDate	Date	Required	Training end date	End date of the training period.
FLA39	trainingStatus	Integer (int32) 1/9	Required	Training status	Zone specifying the status of the training: 1 = Followed 2 = Not followed 3 = Not suitable for the employee 4 = Reserved for the employee (not yet followed)
FLA23	trainingType	Integer (int32) 1/9	Required	Training type	Field defining the type of training: 1 = formal training 2 = informal training
FLA24	trainingPlace	Integer (int32) 1/9	Optional	Training place	Place of the training: 1 = Internal ( On-site) 2 = External (Off-site) 3 = Online 4 = Abroad (outside Belgium)
FLA40	additionalInformation	String ( max500)	Optional	Additional information	Free text area in which additional information about the training period can be indicated. Depending on the needs of the declarant, this may be the reference of the training period, the title of the training module that is/will be followed during the (specific) training period, etc.
FLA44 TrainingCancellation			See decription code FLA41	Cancellation of training	Block to use to delete a previously sent training.
FLA45	TrainingId	String (36) - UUID format	Required	Unique training reference number	Unique reference number of the training in a standard UUID format: string of 36 characters (32 hexadecimal digits and 4 hyphens). This number is used to uniquely identify a training. Example: ffa072c4-6ece-43de-beef-1d1927252d58

Code	name	type	presence	title ENG	description ENG
<b>FLA87</b>	<b>FLAProviderDataRequest</b>	functional block		Request for export of FLA data from a provider	Main block of a request to export “Federal Learning Account” data already recorded by a training provider. This block contains the parameters of the export
00024	inss	long (number) - Max 11 Digits	Required	INSS	Employee’s social security identification number. This is the national register number or bis number.
00014	companyID	long (number) - Max 10 Digits	Required	Company number	Employer's CBE number
<b>FLA88</b>	<b>SearchPeriod</b>	functional block	Optional	Search period	Block containing criteria related to training dates
FLA89	SearchTrainingFirstStartDate	Date	Optional	Start date of the search period	When the zone is present, the export is limited to trainings which have a first start date greater than or equal to this criterion.
FLA90	SearchTrainingLastEndDate	Date	Optional	End date of the search period	When the zone is present, the export is limited to trainings which have a last end date less than or equal to this criterion.
<b>FLA91</b>	<b>FLAProviderDataResponse</b>	functional block		FLA Data Export Request Response from a Provider	Main block of a “Federal Learning Account” data export according to the parameters received by a FLAProviderDataRequest.
<b>FLA92</b>	<b>RequestCriteria</b>	functional block	Required	Search criteria	Block containing the export parameters received in the FLDP002-FLAProviderDataRequest request
00024	inss	long (number) - Max 11 Digits	Required	INSS	Employee’s social security identification number. This is the national register number or bis number.
00014	companyID	long (number) - Max 10 Digits	Required	Company number	Employer's CBE number
<b>FLA88</b>	<b>SearchPeriod</b>	functional block	Optional	Search period	Block containing criteria related to training dates
FLA89	SearchTrainingFirstStartDate	Date	Optional	Start date of the search period	When the zone is present, the export is limited to trainings which have a first start date greater than or equal to this criterion.
FLA90	SearchTrainingLastEndDate	Date	Optional	End date of the search period	When the zone is present, the export is limited to trainings which have a last end date less than or equal to this criterion.
<b>FLA93</b>	<b>TrainingSearchResult</b>	functional block	required	Result of a training search	Block containing the requested training export.
00024	inss	long (number) - Max 11 Digits	Required	INSS	Employee’s social security identification number. This is the national register number or bis number.
<b>FLA15</b>	<b>Training</b>	functional block		Training	Block containing the training details
00014	companyID	long (number) - Max 10 Digits	Required	Company number	Employer's CBE number
FLAAN	LegalCompanyID	long (number) - Max 10 Digits	Optional	CBE number of the worker's legal employer	CBE number of the worker's legal employer. This is the employer who assumes legal responsibility for the worker and who is also the employer who signed the employment contract with the worker. This field is used when the factual employer (i.e., the employer for which the worker actually provided services and who has authority over him) is different from the legal employer. In this case, the factual employer is encoded in the companyID field and the legal employer is encoded in the legalCompanyID field.
FLA45	TrainingId	String (36) - UUID format	Required	Unique training reference number	Unique reference number of the training in a standard UUID format: string of 36 characters (32 hexadecimal digits and 4 hyphens). This number is used to uniquely identify a training. Example: ffa072c4-6ece-43de-beef-1d1927252d58
FLA21	trainingDenomination	String (min 3 - max500)	Required	Training title	Denomination of the training.
FLA19	trainingFirstStartDate	Date	Required	First start date of the training	First start date of the training. For trainings that are declared in multiple training periods, this is the start date of the earliest period.
FLA20	trainingLastEndDate	Date	Required	Last end date of the training	Last end date of the training. For trainings that are declared in multiple training periods, this is the end date of the last period.
FLA22	trainingReferenceNbr	String - max500	Optional	Training reference	Reference of the training (declarant's internal reference number)
01047	language	Integer (int32) - Max 1 Digit	Optional	Language	Language 1 = Dutch 2 = French 3 = German 4 = English

Glossarium - FLDP002 - FLAR002

FLA26	trainingResult	Integer (int32)1/9	Required	Result of the training	Zone specifying the result of the training: 1 = The training was 'successful' 2 = The training was 'failed' 3 = The training was interrupted 4 = The training was completed but had no results 5 = The training has not yet been completed
FLA30	Scope	Integer (int32) 1/9	Required	Scope	Zone indicating whether or not the training falls within the scope of the “Federal Learning Account”. This zone allows you to know whether the training is to be taken into consideration when calculating the remaining training credit. 1= Training falls within the FLA scope 2= Training does not fall within the FLA scope
FLA48	TrainingCost	integer Min: 0	Optional	Cost of the training	Amount of the cost of the training expressed in eurocents 120025 = 1200.25€
FLA49 Certificate		functional block	Optional	certificate	Block containing the characteristics of the certificate obtained at the end of the training
FLA27	trainingLeadingToCertificate	Integer (int32)1/9	Required	Training has led to obtaining a certificate	Zone indicating whether the training has resulted in obtaining a certificate (or another performance certificate such as a diploma, etc.). 1 = The training does not lead to a certificate 2 = The training leads to a certificate
FLA83	CertificateType	Integer Min:1 - Max:99	Optional	Certificate type	Area that defines the type of certificate 1 = ..."
FLA28	certificateValidityStartDate	Date	Optional	Certificate validity start date	Start date of the validity of the certificate.
FLA29	certificateValidityEndDate	Date	Optional	Certificate validity expiry date	End date of the validity of the certificate.
FLA36 DetailsPerPeriod		functional block	Required	Details of a training period	Data block containing details about the training period
FLA18	trainingHours	Integer (int32) Min:0 - Max:1560000	Required	Number of training hours	Number of training hours of the training period expressed in hundredths of an hour. Value between 0 (= 0 hours) and 1560000 (= 15600 hours = 5 years of 312 days of 10 hours).
FLA37	trainingStartDate	Date	Required	Training start date	Start date of the training period.
FLA38	trainingEndDate	Date	Required	Training end date	End date of the training period.
FLA39	trainingStatus	Integer (int32) 1/9	Required	Training status	Zone specifying the status of the training: 1 = Followed 2 = Not followed 3 = Not suitable for the employee 4 = Reserved for the employee (not yet followed)
FLA23	trainingType	Integer (int32) 1/9	Required	Training type	Field defining the type of training: 1 = formal training 2 = informal training
FLA24	trainingPlace	Integer (int32) 1/9	Optional	Training place	Place of the training: 1 = Internal ( On-site) 2 = External (Off-site) 3 = Online 4 = Abroad (outside Belgium)
FLA40	additionalInformation	String ( max500)	Optional	Additional information	Free text area in which additional information about the training period can be indicated. Depending on the needs of the declarant, this may be the reference of the training period, the title of the training module that is/will be followed during the (specific) training period, etc.
90176 AnomalyReport		functional block	Optional	Anomaly Report	Functional block for reporting information regarding the anomaly report.
00108	ErrorID	String (9) Format : 12345-123	Required	error identifier	Error identifier The first 5 digits indicate the zone or BF to which the anomaly relates and the last 3 digits indicate the type of anomaly. For the latter, see Appendix 30 - General list of social security anomaly codes.
00235	TagName	String	Optional	TAG Name	Name of the XML tag where the error occurred.
00236	Value	String	Optional	Value	The value that caused the error.

Glossarium - FLDP002 - FLAR002

00497	AnomalyClass	Sring(2)	Optional	Severity of the anomaly	This area provides information on the severity of the detected anomaly. B = Blocking anomaly P = Percentage anomaly NP = Non-percentage anomaly D = Anomaly relating to the verification of the right to a deduction W = Warning I = Investigation NB = Non-blocking anomaly
00628	AnomalyLabel	String(500)	Optional	Anomaly label	Text description of the anomaly including the label of the area or block to which the anomaly relates and the specific label of the anomaly
90178	Path	functional block	Optional	path	Functional block for declaring information regarding the path to anomalies.
00024	inss	long (number) - Max 11 Digits	Required	INSS	Employee's social security identification number. This is the national register number or bis number.
00014	companyID	long (number) - Max 10 Digits	Required	Company number	Employer's CBE number
FLA45	TrainingId	String (36) - UUID format	Required	Unique training reference number	Unique reference number of the training in a standard UUID format: string of 36 characters (32 hexadecimal digits and 4 hyphens). This number is used to uniquely identify a training. Example: ffa072c4-6ece-43de-beef-1d1927252d58
FLA37	trainingStartDate	Date	Required	Training start date	Start date of the training period.
FLA38	trainingEndDate	Date	Required	Training end date	End date of the training period.
